PROFILE

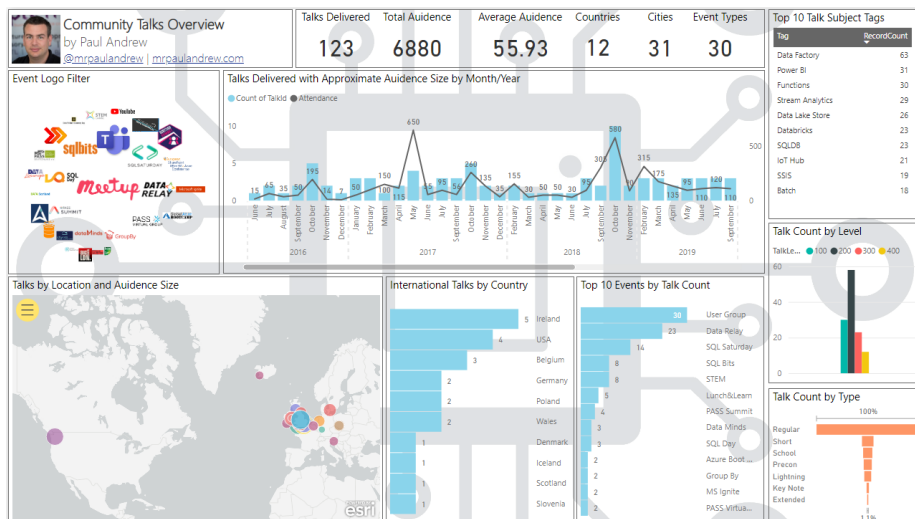

As a highly motivated, passionate individual I approach every solution with an equal and absolute perception that anything is possible. My career has gifted me knowledge on a wide-reaching toolkit of technologies that can be harnessed and manipulated to overcome data handling problems big and small. I have a proactive mentality and the drive to achieve the best in all aspects of life. I also enjoy sharing my knowledge as a community speaker, regular blogger, event's organiser, and mentor. Finally, experience delivering end to end solutions has taught me that degree of pragmatism and transparency always yields the best results, regardless of the technical challenge. Coupled with quality through testing.

OVERVIEW

- * Designed and delivered data platform solutions for enterprise customers globally.
- * 10+ years' experience working with Microsoft SQL Server.
- * 6+ years' experience working with the Microsoft Azure Data Platform.
- * Industry verticals; healthcare, retail, gaming, manufacturing.
- * Microsoft exam question author and moderator.
- * Framework (procfwk.com) creator.
- * Book technical reviewer (Azure Data Factory by Example. ISBN-101484270282).

DATA PLATFORM COMMUNITY INVOLVEMENT

As a Microsoft Data Platform MVP, I'm a very active member of the wider data community having now spoken at 123 events and conferences across 12 countries.

EMPLOYMENT HISTORY

EMPLOYMENT HISTORY Continued

Application/Integration Developer *Somerset Health Informatics*

August 2011 – October 2012

Development and operational responsibility of the shared services county wide integration engines offering my skills connecting numerous acute trust localised systems to their main patient administration system. This was typically achieved using HL7 messaging via 4x full Mirth Appliances and JavaScript combined with custom build web services to trigger whatever event or action was required for successful data flows.

- * .Net web services developer
- * HL7 interface developer
- * Integrations specialist
- * 3rd line technical Support engineer

Information and Testing Analyst *Taunton and Somerset Foundation Trust*

August 2009 – August 2011

Assist with the general workings of the acute trust's information and performance department, plus automating and improving report delivery where possible. Then test features developed as part of the ongoing business intelligence project to fully adopt Tableau and Microsoft Reporting Services.

- * Tableau developer
- * Data flow tester
- * Dashboard creator
- * NHS dataset analysis
